Knowledge base template version

Components package name	Components version	Template version
Experience Manager Guides Components Content Package for Cloud Service	guides-components.all-1.6.0	aem-site-template-dxml-1.0.17

Upgrade to 2026.11.0 release

Experience Manager Guides is upgraded automatically upon upgrading to the latest release of Experience Manager as a Cloud Service.

> [!IMPORTANT]
>
> The release includes updates to folder profile settings (ui_config.json). If you are using custom settings, ensure to take a back up of those before upgrading. After the update, review and adjust your settings to align with the changes introduced in the latest version.

Review and validate your setup configurations to confirm they are correctly implemented. If you have introduced any custom configuration changes, view Additional configuration for upgrading Cloud Service for any additional procedures applicable to the version you are upgrading from.
